Abhishek Bangar

OBJECTIVE

Looking for a challenging role in a reputable organization to utilize my technical, database, and management skills for the growth of the organization as well as to enhance my knowledge about new and emerging trends in the IT sector.

SKILLS

C, C++, Java, Python, Data Science, JavaScript, HTML, CSS, MySQL, PHP, Git, GitHub.

PROJECTS

EMPLOYEE DATABASE SYSTEM

November 2018

Developed an Employee Database System by using C language. Employee record system is an application that enables users to create and store Employee Records. Thus, there is a need of a system which can handle the data of such a large number of Employees in an organization. This project simplifies the task of maintain records because of its user-friendly nature.

PLOTTER SYSTEM (DATA SCIENCE PROJECT)

September 2019

This project is made by using python and its libraries like pandas, plotly, cufflinks, matplotlib, NumPy. Plotter system is an application that enables users to transform their data into the different types of plot system and also store own data, random data. Thus, there is a need of a system which can transform their data into the plot system in less time. This project simplifies the task of any data into plot system because of its user-friendly nature.

EMPLOYEE MANAGEMENT WEBSITE

August 2020

This is a simple Employee Management website made by using HTML, CSS and Bootstrap5. In this website we add, delete and get details of employee. This is a Front-End website not a backend.

DAILY ROUNTINE DATABASE APPLICATION

December 2020

This is made by using python, and its libraries like sqlite3, tkinter. This is a complete database application. We can store the data of our daily routine and delete, add, view the all data any time.
